PCB INVENTORY

JANUARY 1, 1978 - DECEMBER 31, 1978

PCB INVENTORY

January 1, 1978 - December 31, 1978

As of January 1, 1979, the following PCB capacitors were in use at the ORGDP:

| <u>Location</u> | <u>Number</u> | <u>Wt. (Kg)</u> |                 |
|-----------------|---------------|-----------------|-----------------|
|                 |               | <u>Each</u>     | <u>Total</u>    |
| K-25            | 320           | 10.8            | 3,456.0         |
| K-27            | 2,618         | 9.7             | 25,394.6        |
| K-29            | 690           | 10.8            | 7,452.0         |
| K-31            | 3,300         | 8.0             | 26,400.0        |
| K-33            | 4,739         | 13.0            | <u>61,607.0</u> |
|                 |               |                 | 124,309.6       |

PCB INVENTORY

January 1, 1978 - December 31, 1978

As of January 1, 1979, the following PCB transformers were in use at the ORGDP:

| <u>Location</u> | <u>Number</u> | <u>Wt. (Kg)</u> |              |
|-----------------|---------------|-----------------|--------------|
|                 |               | <u>Each</u>     | <u>Total</u> |
| K-33            | 40            | 9,576           | 383,040.0    |
| K-33            | 28            | 7,781           | 217,868.0    |
| K-33            | 8             | 7,781           | 62,248.0     |
| K-33            | 4             | 7,281           | 29,124.0     |
| K-1035          | 1             | 624             | 624.0        |
| K-1036          | 2             | 568             | 1,136.0      |
| K-1401          | 1             | 1,215           | 1,215.0      |
| K-633           | 1             | 7,781           | 7,781.0      |
| K-711           | 1             | 624             | 624.0        |
| K-1001          | 2             | 1,306           | 2,612.0      |
| K-1001          | 1             | 903             | <u>903.0</u> |
|                 |               |                 | 707,175.0    |

PCB INVENTORY

January 1, 1978 - December 31, 1978

From January 1, 1978, to December 31, 1978, the following materials were placed in storage for future disposal:

| <u>Plant Origin</u> | <u>Number</u> | <u>Container</u> | <u>Contents</u>          | <u>Wt. (Kg)</u> |
|---------------------|---------------|------------------|--------------------------|-----------------|
| K-25                | 14            | Drum             | PCB solids               | 1,710.0         |
| Y-12                | 6             | Drum             | PCB solids               | 452.0           |
| X-10                | 2             | Drum             | PCB solids               | 113.0           |
| K-25                | 42            | Drum             | PCB liquid               | 11,108.0        |
| K-25                | 37            | Drum             | PCB liquid -<br>Kerosene | 5,920.0         |
| Y-12                | 4             | Drum             | PCB liquid               | 658.0           |
| X-10                | 4             | Drum             | PCB liquid               | 556.0           |
| K-25                | 32            | Drum             | Capacitors               | 5,116.0         |
| Y-12                | 6             | Drum             | Capacitors               | 842.0           |

| Y-12                | 0             | Transformer      | Transformer              | 0.0             |
| X-10                | 2             | Transformer      | Transformer              | <u>1,636.0</u>  |
|                     |               |                  |                          | 35,655.0        |

PCB INVENTORY

January 1, 1978 - December 31, 1978

As of January 1, 1979, the following materials were in storage for future disposal:

| <u>Number</u> | <u>Container</u> | <u>Type</u>         | <u>Wt. (Kg)</u> | <u>Location</u> |
|---------------|------------------|---------------------|-----------------|-----------------|
| 22            | Drum             | PCB solids          | 2,275.0         | K-306-1         |
| 50            | Drum             | PCB liquid          | 12,322.0        | K-306-1         |
| 37            | Drum             | PCB liquid-kerosene | 5,920.0         | K-726           |
| 38            | Drum             | Capacitors          | 5,958.0         | K-306-1         |
| 11            | Transformer      | Transformer         | 9,180.0         | K-726           |

As of January 1, 1979, the following PCB storage tanks were in use at the ORGDP:

| <u>Location</u> | <u>Number</u> | <u>Wt. (Kg)</u> |              |
|-----------------|---------------|-----------------|--------------|
|                 |               | <u>Each</u>     | <u>Total</u> |
| K-33            | 13            | 5,374.15        | 69,864.0     |

There were no shipments of PCB materials from January 1, 1978 to December 31, 1978.

PCB INVENTORY

JANAURY 1, 1979 - DECEMBER 31, 1979

PCB INVENTORY

January 1, 1979 - December 31, 1979

As of January 1, 1980, the following PCB capacitors were in use at the ORGDP:

| <u>Location</u> | <u>Number</u> | <u>Wt. (Kg)</u> |                 |
|-----------------|---------------|-----------------|-----------------|
|                 |               | <u>Each</u>     | <u>Total</u>    |
| K-25            | 320           | 10.8            | 3,456.0         |
| K-27            | 2,348*        | 9.7             | 22,775.6        |
| K-29            | 690           | 10.8            | 7,452.0         |
| K-31            | 3,300         | 8.0             | 26,400.0        |
| K-33            | 4,739         | 13.0            | <u>61,607.0</u> |
|                 |               |                 | 121,690.6       |

\* Reduction of 270 capacitors from 1978 inventory.  
These capacitors were removed on 11/05/79.  
Drums #328-337.

PCB INVENTORY

January 1, 1979 - December 31, 1979

As of January 1, 1980, the following PCB transformers were in use at the ORGDP:

| <u>Location</u> | <u>Number</u> | <u>Wt. (Kg)</u> |              |
|-----------------|---------------|-----------------|--------------|
|                 |               | <u>Each</u>     | <u>Total</u> |
| K-33            | 40            | 9,576           | 383,040.0    |
| K-33            | 28            | 7,781           | 217,868.0    |

- PCB INVENTORY -

January 1, 1979 - December 31, 1979

As of January 1, 1980, the following materials were in storage for future disposal:

| <u>Number</u> | <u>Container</u> | <u>Type</u>          | <u>Wt. (Kg)</u> | <u>Location</u> |
|---------------|------------------|----------------------|-----------------|-----------------|
| 103           | Drum             | PCB solids           | 16,353.0        | K-306-1         |
| 118           | Drum             | PCB liquid           | 34,262.0        | K-306-1         |
| 98            | Drum             | PCB liquid-kerosene  | 15,789.0        | K-726           |
| 54            | Drum             | PCB liquid-waste oil | 9,119.0         | K-726           |
| 4             | Drum             | Capacitors           | 378.0           | K-306-1         |
| 0             | Transformer      | Transformer          | 0.0             | K-726           |

As of January 1, 1980, the following PCB storage tanks were in use at the ORGDP:

| <u>Location</u> | <u>Number</u> | <u>Wt. (Kg)</u> |              |
|-----------------|---------------|-----------------|--------------|
|                 |               | <u>Each</u>     | <u>Total</u> |
| K-33            | 13            | 5,374.15        | 69,864.      |

PCB INVENTORY

January 1, 1979 - December 31, 1979

From January 1, 1979 to December 31, 1979 the following PCB materials were removed from the ORGDP:

| <u>Number</u> | <u>Container</u> | <u>Type</u> | <u>Wt. (Kg)</u> |
|---------------|------------------|-------------|-----------------|
| 32            | Drum             | PCB solids  | 2,874.0         |
| 1             | Drum             | PCB liquid  | 80.0            |
| 62            | Drum             | Capacitors  | 15,812.0        |
| 28            | Transformer      | Transformer | <u>48,379.0</u> |
|               |                  |             | 67,145.0        |

All PCB materials were shipped to Chemical Waste Management in Emelle, Alabama.

PCB INVENTORY

JANAURY 1, 1980 - DECEMBER 31, 1980

PCB INVENTORY

January 1, 1980 - December 31, 1980

As of January 1, 1981, the following PCB capacitors were in use at the ORGDP:

| <u>Location</u> | <u>Number</u> | <u>Each</u> | <u>Wt. (Kg)</u><br><u>Total</u> |
|-----------------|---------------|-------------|---------------------------------|
| K-25            | 320           | 10.8        | 3,456.0                         |
| K-27            | 2,348         | 9.7         | 22,775.6                        |
| K-29            | 690           | 10.8        | 7,452.0                         |
| K-31            | 3,300         | 8.0         | 26,400.0                        |
| K-33            | 4,739         | 13.0        | <u>61,607.0</u>                 |
|                 |               |             | 121,690.6                       |

As of January 1, 1981, the following PCB transformers were in use at the ORGDP.

| <u>Location</u> | <u>Number</u> | <u>Wt. (Kg)</u> |              |
|-----------------|---------------|-----------------|--------------|
|                 |               | <u>Each</u>     | <u>Total</u> |
| K-33            | 40            | 9,576.0         | 383,040.0    |
| K-33            | 28            | 7,781.0         | 217,868.0    |
| K-33            | 8             | 7,781.0         | 62,248.0     |
| K-33            | 4             | 7,281.0         | 29,124.0     |
| K-633           | 1             | 7,781.0         | 7,781.0      |
| K-1401          | 1             | 1,215.0         | 1,215.0      |
| K-791-N         | 2             | 115.0           | 230.0        |
| K-791-S         | 2             | 115.0           | 230.0        |
| K-1002          | 3             | 136.0           | <u>408.0</u> |
|                 |               |                 | 702,144.0    |

As of January 1, 1981, the PCB transformers (mineral oil contaminated with greater than 500 ppm PCB) were in use at the ORGDP.\*

| <u>Location</u> | <u>Number</u> | <u>Wt. (Kg)</u> |                |
|-----------------|---------------|-----------------|----------------|
|                 |               | <u>Each</u>     | <u>Total</u>   |
| K-862           | 1             | 1,701.0         | 1,701.0        |
| K-1131          | 2             | 1,701.0         | 1,701.0        |
| K-1301          | 1             | 1,500.0         | 1,500.0        |
| K-1401          | 4             | 1,701.0         | <u>6,804.0</u> |
|                 |               |                 | 11,706.0       |

\*In 1980, a PCB mineral oil transformer sampling program was initiated. The following transformers were added to the inventory following this program.

As of January 1, 1981, the following PCB storage tanks were in use at the ORGDP:

| <u>Location</u> | <u>Number</u> | <u>Wt. (kg)</u> |
|-----------------|---------------|-----------------|
| K-33            | 13            | 69,864.0        |

From January 1, 1980, to December 31, 1980, the following materials were placed in storage for future disposal:

| <u>Plant Origin</u> | <u>Number</u> | <u>Container</u> | <u>Contents</u>                       | <u>Wt. (Kg)</u> |
|---------------------|---------------|------------------|---------------------------------------|-----------------|
| K-25                | 11            | Drum             | PCB Solids                            | 1,299.0         |
| Y-12                | 33            | Drum             | PCB Solids                            | 3,963.0         |
| X-10                | 2             | Drum             | PCB Solids                            | 140.0           |

PCB INVENTORY

JANAURY 1, 1981 - DECEMBER 31, 1981

PCB Inventory  
January 1, 1981 - December 31, 1981

As of January 1, 1982, the following PCB capacitors were in use at the ORGDP:

| <u>Location</u> | <u>Number</u> | <u>Wt. (Kg)</u><br><u>Each</u> | <u>Total</u>    |
|-----------------|---------------|--------------------------------|-----------------|
| K-25            | 320           | 10.8                           | 3,456.0         |
| K-27            | 2,348         | 9.7                            | 22,775.6        |
| K-29            | 690           | 10.8                           | 7,452.0         |
| K-31            | 3,300         | 8.0                            | 26,400.0        |
| K-33            | 4,739         | 13.0                           | <u>61,607.0</u> |
|                 |               |                                | 121,690.6       |

As of January 1, 1982, the following PCB transformers were in use at the ORGDP.

| <u>Location</u> | <u>Number</u> | <u>Wt. (Kg)</u> |                |
|-----------------|---------------|-----------------|----------------|
|                 |               | <u>Each</u>     | <u>Total</u>   |
| K-33            | 40            | 9,576           | 383,040.0      |
| K-33            | 28            | 7,781           | 217,868.0      |
| K-33            | 8             | 7,781           | 62,248.0       |
| K-33            | 4             | 7,281           | 29,124.0       |
| K-633*          | 1             | 7,781           | <u>7,781.0</u> |
|                 |               |                 | 700,061.0      |

\*During 1981, this transformer was taken out of services and designated as a K-33 process transformer spare.

As of January 1, 1982, the following PCB transformers (mineral oil contaminated with greater than 500 ppm PCB) were in use at the ORGDP:

| <u>Location</u> | <u>Number</u> | <u>Wt. (Kg)</u> |                |
|-----------------|---------------|-----------------|----------------|
|                 |               | <u>Each</u>     | <u>Total</u>   |
| *K-862          | 1             | 1,597.0         | 1,597.0        |
| *K-1131         | 2             | 1,600.0         | 3,200.0        |
| *K-1301         | 1             | 1,408.0         | 1,408.0        |
| *K-1401         | 4             | 1,408.0         | 5,632.0        |
| **K-731         | 3             | 736.0           | 2,208.0        |
| **K-731         | 3             | 1,104.0         | 3,312.0        |
| **K-791         | 5             | 1,104.0         | 5,520.0        |
| **K-791         | 2             | 845.0           | 1,690.0        |
| **K-791         | 1             | 1,280.0         | 1,280.0        |
| **Elza K-741    | 2             | 1,104.0         | <u>2,208.0</u> |
|                 |               |                 | 28,055.0       |

\*Due to the use of differing calculated densities, the weights of these transformers have changed from the 1980 PCB Inventory.

\*\*In 1980, a PCB mineral oil transformer sampling program was initiated. These transformers were added to the inventory following the program.

From January 1, 1981, to December 31, 1981, the following materials were placed in storage for future disposal:

| <u>Plant Origin</u> | <u>Number</u> | <u>Container</u> | <u>Contents</u>     | <u>Wt. (Kg)</u> |
|---------------------|---------------|------------------|---------------------|-----------------|
| K-25                | 10            | Drum             | PCB Solids          | 3,315.0         |
| K-25                | 8             | Drum             | PCB Liquid          | 2,600.0         |
| K-25                | 10            | Drum             | PCB Liquid-Kerosene | 1,650.0         |
| X-10                | 2             | Drum             | PCB Liquid          | 650.0           |

From January 1, 1981, to December 31, 1981, the following PCB materials were removed from the ORGDP:

| <u>Number</u> | <u>Container</u> | <u>Type</u> | <u>Wt. (Kg)</u> |
|---------------|------------------|-------------|-----------------|
| 40            | Drum             | PCB Solids  | 8,377.0         |
| 0             | Drum             | PCB Liquid  | 0.0             |
| 17            | Drum             | Capacitors  | 2,811.0         |
| 0             | Transformer      | Transformer | 0.0             |

All PCB materials were shipped to Chemical Waste Management in Emelle, Alabama.

In addition, the following materials are maintained for future use or disposal.\*

| <u>Location</u> | <u>Number</u> | <u>Container</u>   | <u>Wt. (Kg)</u> |              |
|-----------------|---------------|--------------------|-----------------|--------------|
|                 |               |                    | <u>Each</u>     | <u>Total</u> |
| K-33            | 7             | Transformer Casing | Empty           | Empty        |
| K-33            | 1             | Transformer Casing | 9,488           | 9,488.0      |

| K-33            | 3             | Transformer        | 6,023           | 18,069.0     |
| K-33            | 1             | Transformer        | Empty           | Empty        |
| K-33            | 1             | Storage Tanks      | 2,727           | 2,727.0      |
| K-33            | 1             | Storage Tanks      | 9,659           | 9,659.0      |

\*Due to different accounting measures, these transformer casings were listed on previous inventories as 13 storage tanks in K-33.

PCB INVENTORY

JANAURY 1, 1982 - DECEMBER 31, 1982

PCB Inventory  
January 1, 1982 - December 31, 1982

As of January 1, 1983, the following PCB capacitors were in use at the ORGDP:

|                 |               | <u>Wt. (Kg)</u> |                 |
|-----------------|---------------|-----------------|-----------------|
| <u>Location</u> | <u>Number</u> | <u>Each</u>     | <u>Total</u>    |
| K-25            | 320           | 10.8            | 3,456.0         |
| K-27            | 2,323*        | 9.7             | 22,533.0        |
| K-29            | 690           | 10.8            | 7,452.0         |
| K-31            | 3,300         | 8.0             | 26,400.0        |
| K-33            | 4,737**       | 13.0            | <u>61,581.0</u> |
|                 |               |                 | 121,422.0       |

\*Reduction of 25 capacitors from 1981 inventory. These capacitors were removed on 07/23/82. Drums #754-758.

\*\*Reduction of two capacitors from 1981 inventory. These capacitors were removed on 07/08/82. Drum #741.

As of January 1, 1983, the following PCB transformers were in use at the ORGDP:

| <u>Location</u> | <u>Number</u> | <u>Wt. (Kg)</u> |                |
|-----------------|---------------|-----------------|----------------|
|                 |               | <u>Each</u>     | <u>Total</u>   |
| K-33            | 40            | 9,576           | 383,040.0      |
| K-33            | 28            | 7,781           | 217,868.0      |
| K-33            | 8             | 7,781           | 62,248.0       |
| K-33            | 4             | 7,281           | 29,124.0       |
| K-33*           | 1             | 7,781           | <u>7,781.0</u> |
|                 |               |                 | 700,061.0      |

\*This transformer is the transformer listed at K-633 on the 1981 inventory.

As of January 1, 1983, the following PCB transformers (mineral oil contaminated with greater than 500 ppm PCB) were in use at the ORGDP:

| <u>Location</u> | <u>Number</u> | <u>Wt. (Kg)</u> |                |
|-----------------|---------------|-----------------|----------------|
|                 |               | <u>Each</u>     | <u>Total</u>   |
| K-862           | 1             | 1,597.0         | 1,597.0        |
| K-1131          | 2             | 1,600.0         | 3,200.0        |
| K-1301          | 1             | 1,408.0         | 1,408.0        |
| K-1401          | 4             | 1,408.0         | 5,632.0        |
| K-731           | 3             | 736.0           | 2,208.0        |
| K-731           | 3             | 1,104.0         | 3,312.0        |
| K-791           | 5             | 1,104.0         | 5,520.0        |
| K-791           | 2             | 845.0           | 1,690.0        |
| K-791           | 1             | 1,280.0         | 1,280.0        |
| K-791*          | 1             | 4,239.0         | 4,239.0        |
| Elza K-741      | 2             | 1,104.0         | <u>2,208.0</u> |
|                 |               |                 | 32,294.0       |

\*In 1980, a PCB mineral oil transformer sampling program was initiated. This transformer was added to the inventory following this program.

From January 1, 1982, to December 31, 1982, the following materials were placed in storage for future disposal:

| <u>Plant Origin</u> | <u>Number</u> | <u>Container</u> | <u>Contents</u>                         | <u>Wt. (Kg)</u> |

|                 |               |                 | 33,094.0       |

\*Resampling of this transformer indicates a reduction of PCB ppm below 500 ppm.

\*\*There have been quality assurance problems with analytical results from mineral oil transformers contaminated with PCB. These problems have been corrected, and as a result of resampling, three transformers have been added to the inventory of 1982. As resampling continues, other transformers may be added to or deleted from the inventory.

From January 1, 1983, to December 31, 1983, the following materials were placed in storage for future disposal:

| <u>Plant Origin</u> | <u>Number</u> | <u>Container</u> | <u>Contents</u>           | <u>Wt. (Kg)</u> |
|---------------------|---------------|------------------|---------------------------|-----------------|
| K-25                | 32            | Drum             | PCB Solids                | 5,410.0         |

Where the rate is dependent on value, shippers are required to state specifically in writing the agreed or declared value of the property.

The agreed or declared value of the property is hereby specifically stated by the shipper to be not exceeding:

If the shipment moves between two ports by a carrier by water, the law requires that the bill of lading shall state whether it is "carrier's or shipper's weight."

Signature

Subject to Section 7 of the conditions, if this shipment is to be delivered to the consignee without recourse on the consignor, the consignor shall sign the following statement:  
The carrier shall not make delivery of this shipment without payment of freight and all other lawful charges.

(Signature of Consignor)

RECEIVED, subject to the classifications and tariffs in effect on the date of the issue of this bill of lading, the property described above in apparent good order, except as noted (contents and condition of contents of packages unknown), marked, consigned, and destined as indicated above which said carrier (the word carrier being understood throughout this contract as meaning any person or corporation in possession of the property under the contract) agrees to carry to its usual place of delivery at said destination, if on its route, otherwise to deliver to another carrier on the route to said destination. It is mutually agreed as to each carrier of all or

any of, said property over all or any portion of said route to destination and as to each party at any time interested in all or any said property, that every service to be performed hereunder shall be subject to all the bill of lading terms and conditions in the governing classification on the date of shipment.

Shipper hereby certifies that he is familiar with all the bill of lading terms and conditions in the governing classification and the said terms and conditions are hereby agreed to by the shipper and accepted for himself and his assigns.

## CERTIFICATION

This is to certify that the above-named materials are properly classified, described, packaged, marked and labeled, and are in proper condition for transportation according to the applicable guidelines of the Department of Transportation and the U.S. Environmental Protection Agency.

PCB Transformer Inspection Audit

On August 7, 1984, an audit of the PCB transformer inspection records for the Cascade Operations Department was conducted by J. E. Stone, of the Environmental Management Department. This audit was performed to ensure compliance with EPA regulations regarding PCB transformer inspections.

The PCB transformer inspections for the Cascade Operations Department are performed by Mr. K. L. Woodard, once every quarter. These inspections include the following items:

- date of inspection
- location of transformer
- all leaks observed
- all leaks repaired if needed
- severity of leaks
- old leaks that were re-epoxyed
- leaks not accessible but cleaned
- name of inspector

All leaks are repaired in conjunction with each inspection performed on PCB transformers.

After reviewing the inspection records of the Cascade Operations Department for PCB transformers, it was found that these inspections are being conducted in compliance with all EPA regulations regarding this matter.

It is hoped that this level of performance will continue in the future to ensure compliance. Attached is a copy of an inspection log sheet,

transformer grid sheets, and other correspondence concerning the inspections.

PCB Transformer Inspection Audit

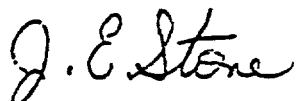

On August 13, 1984, an audit of the PCB transformer inspection records for the Power Operations Department was conducted by J. E. Stone of the Environmental Management Department. The audit was performed to ensure compliance with EPA regulations concerning the inspection of PCB transformers.

The inspections of PCB transformers, for the Power Operations Department, are performed by Mr. A. D. Hair. These inspections are performed once every quarter and include the following items:

- date of inspection
- transformer number and location
- leaks observed if any
- severity of leaks if observed
- date of repair
- repaired by
- name of inspector

After examining the inspection records, it was found that the inspections are being performed in compliance with the EPA regulations concerning PCB transformers. It is hoped that this practice will continue in the future.

Attached is a copy of the inspection reports for PCB transformers dated January 1, 1984, to the present.

Gentlemen:

Sampling for PCB Contamination at the Oak Ridge Gaseous Diffusion Plant

In order to evaluate specific areas at ORGDP for PCB contamination, soil samples were taken from electrical switchyards, and sludge samples were taken from sewage treatment tanks.

On August 10, 1984, sludge samples were taken from the two sewage treatment Inhoff tanks located at ORGDP. The sludge was analyzed for PCB concentrations. The analyses indicate PCB concentrations less than 0.001 mg/liter in both tanks. Attachment 1 is a copy of the data for the Inhoff tanks.

On December 12 and 13, 1984, soil samples were taken at the following switchyards.

1. K-27 Switchyard (ORGDP)
2. K-31 Switchyard (ORGDP)
3. K-33 Switchyard (ORGDP)
4. X-10 Switchyard (ORNL)
5. Elza Switchyard (Y-12)

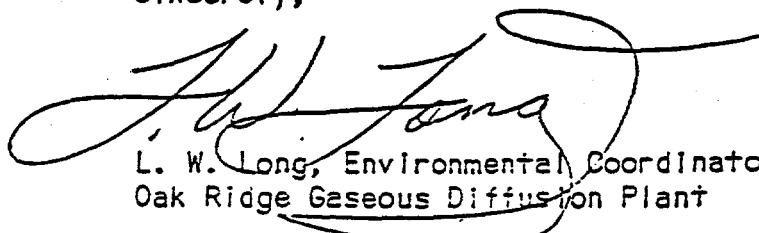

Three locations were sampled within each switchyard. The gravel cover was removed, then soil samples were taken at depths of four, eight, and twelve inches. The attached data (Attachment 2) indicates the concentrations of PCB found at each location.

It is determined, by ORGDP Environmental Management Department staff, that there are no significant PCB concentrations within the electrical switchyards or the sewage treatment tanks.

March 6, 1985

If you have further questions, please contact J. E. Stone at extension 4-9352.

Sincerely,

L. W. Long, Environmental Coordinator  
Oak Ridge Gaseous Diffusion Plant
